

Case Studies and National Overviews

During the first year of the DIALOGUE network, project partners compiled **case studies** which provide examples of cooperation or **'dialogue'** between researchers and practitioners in **University lifelong learning (ULLL)**.

The Case Studies are listed according to the thematic working group, for which they were produced:

- [Access and Progression](#) ^[1]
- [Learning and Guidance](#) ^[2]
- [New Media](#) ^[3]
- [Quality](#) ^[4]

These case studies are complemented by **national reports or overviews** which provide information on the current state of play between research and professional practice in ULLL. The national overviews are not intended to present a full report on the state of play, but rather information which adds to the understanding of the subject areas in which the case studies are located.
